

Seashine
Fishmeal Plant
Consulting Services Pvt. Ltd.

ABOUT US:

SEASHINE FISHMEAL PLANT CONSULTING SERVICES PRIVATE LIMITED is a Private Limited Company and was incorporated on Mar 09, 2023 and is located in Udupi, Karnataka, India. Its corporate identification number is (CIN) U70200KA2023PTC171056.

Seashine undertakes turnkey projects in the fishmeal and fish oil industry, specializing in consultancy services for enhancing quality and quantity, as well as the erection and commissioning of various machinery, including evaporators, ETP, RO systems, boilers, cooling towers etc.

WHY CHOOSE US:

Seashine offer a comprehensive range of services for the fishmeal and fish oil industry, including consultancy for implementing quality and quantity standards, erection and commissioning of various machinery, ETP, RO systems, boilers, evaporators, and cooling towers, as well as old plant machinery services and annual maintenance. Additionally, we specialize in production improvement, operation training, process upgradation, complete electrical setup, and the construction of boiler chimneys, scrubbers, pallets, and storage tanks (MS & SS). Our services also cover the procurement of essential materials such as machinery, motors, pumps, chemicals, lab equipment, packing materials, hardware items, electrical panels, and spare parts.

With our Comprehensive Production Team Setup, we ensure seamless operations from raw material handling to finished product delivery with zero downtime. Our End-to-End Production Solutions cover every stage of the process, backed by an expert team specializing in efficiency, quality control, and process optimization. We implement Seamless Operations through optimized workflows, proactive planning, and continuous monitoring to eliminate operational disruptions. Our Skilled Workforce is trained in production, quality assurance, and process efficiency, ensuring the highest standards are maintained. Designed to be customized for your needs, our team structures align with specific industry demands and production goals, emphasizing Efficiency & Quality through advanced techniques that maximize productivity while upholding superior quality standards.
